Australia*

PRICELIST
JANUARY 2010

SUPPLIER OF QUALITY SEEDS TO GROWERS SINCE 1926

Fairbanks is Australia's most experienced vegetable seed company. Australia-wide, we have a proud tradition of providing knowledge, value and service to our customers. With a strong focus on product development, Fairbanks is constantly releasing new and innovative vegetable varieties, sourced from leading international breeding companies, helping to contribute to our customer's success.

- Fairbanks has a history of ongoing, consistent results in the areas of higher yields, higher quality and ultimately higher returns at all levels.
- Our insistence on customer satisfaction ensures acknowledgement as the growers' preferred seed supplier - our philosophy remains unchanged.
- We have a fair pricing policy on all seeds and can negotiate bulk quantity purchases.
- Fairbanks, a company and staff with a vision for the future.

Where to find us:

Melbourne Markets

542 Footscray Road, West Melbourne, 3003.

We have EFTPOS facilities available.

We also accept the following Credit Cards to ensure quick processing of phone and mail orders:

Disease Resistance:

IR = Intermediate Resistance. Varieties with an intermediate level of resistance to a specific pathogen or insect pest may perform substantially better than susceptible varieties when moderate to severe pathogen or pest pressure exists. These varieties may exhibit a greater range of symptoms compared to Highly Resistant varieties when grown under similar conditions of moderate to severe pathogen or pest pressure.

HR = Highly Resistance. The ability of a plant variety to highly restrict the activities of a specific pathogen or insect pest and/or to restrict the symptoms and signs of a disease, when compared to susceptible varieties. Resistant varieties may exhibit some symptoms when specified pathogen or pest pressure is severe. New and/or atypical strains of the specific pathogen or pest may overcome the resistance, sometimes completely.

Abbreviations:

A	=	Anthraxnose	BST	=	Bacterial Spot
BW	=	Bacterial Wilt	DMR	=	Downey Mildew Resistant
F	=	Fusarium	Lt	=	Powdery Mildew (<i>Leveillula taurica</i>)
