ASIAN VEGETABLE	
PAK CHOI - GREEN STEM	(300-450 seeds/gram) sold by seed count
Mini-Pak F1	Mini green stem pak choi ideal for bunching. Uniform size and excellent shape. Dark green, smooth, elongated leaf shape. Upright stems with compact plant habit. High-end finished product, presenting beautifully when bunched.
Miyako F1	An outstanding hybrid green stem pak choi for bunching. Miyako is early to mature, compact and suitable for all seasons. Miyako is renowned for its fantastic dark green colour and uniformity. It has good tolerance to bolting and to some Australian races of Club Root. Market leading variety for all segments.
PAK CHOI - WHITE STEM	(300-450 seeds/gram) sold by seed count
Joi Choi F1	Slow bolting, early maturing white stem pak choi. Also known as Bok Choi, market leader for this segment.
CHOY SUM	(300-450 seeds/gram) sold by seed count
NEW Jujitsu F1	Hybrid choy sum for the bunching market. Incredibly dark glossy leaves with medium savoy texture, very slow bolting and especially well suited for warm season production. Semi open growing habit with a mid green stem colour. Outstanding crop uniformity.
CHINESE BROCCOLI (KAILAAN) - STEM TYPE	(150-250 seeds/gram) sold by seed count
Frank F1	Hybrid stem type Chinese broccoli (Kailaan). Produces thick tender stems with rounded green leaves, excellent uniformity. Best suited to cooler seasons, but can be harvested all year round.
CHINESE BROCCOLI (KAILAAN) - LEAF TYPE	(150-250 seeds/gram) sold by seed count
Gazza F1	Hybrid leaf type Chinese broccoli (kailaan). Dark green and glossy leaves with a slightly pointed paddle shape. Medium sized leaves on a short main stem, ideal for bunching. Very uniform growth rate, allowing a one-pass harvest.
Pointed Leaf	Open polinated leaf type kailaan, also known as Chinese broccoli. Dark green leaves with a slightly pointed shape. Traditional variety, well suited for bunching.
BABY BUNCHING BROCCOLI	(150-270 seeds/gram) sold by seed count
Matrix F1 syngenta	A sweet baby broccoli for bunching, designed for multiple picks, increasing yield potential. This baby bunching broccoli is a loose head type, with a sweet and tender stem that forms highly attractive bunches, rivalling the current market standards.
BROCCOLI	(150-270 seeds/gram) sold by seed count
Balard F1 syngenta	Balard is a winter (SE QLD) and spring season harvest broccoli from Syngenta. Medium-large size plant frame with upright habit and good harvest visibility. Heads are high domed, smooth with good bead uniformity and firmness.
McLaren F1 syngenta	A new warm and shoulder season broccoli with the industry leading Syngenta Club Root resistance gene, known as TopRes. This is a breakthrough for growers experiencing Club Root losses. High quality heads with a versatile harvest window. HR: Pb0,1,3
Montevideo F1 syngenta	A cool season harvest broccoli from Syngenta with extended growing periods and excellent field holding ability. It produces premium quality heads with exceptional uniformity. The heads are very firm with a high dome shape and thick stems.
Prophet Performax F1	A cool season harvest broccoli with a medium to fine bead, thick butt with a good tolerance against purpling. Prophet is an industry standard due to its outstanding reliability and slow bolting in the spring timeslot.
BRUSSELS SPROUTS	(200-250 seeds/gram) sold by seed count
EARLY SEASON	
Gustus F1 syngenta	Gustus is a medium maturing early season variety. It has excellent sprout spacing and yield capabilities. Gustus is ideal for hand and machine harvesting.
Luminus F1 syngenta	Luminus is later maturing for the early season slot. Promising results, showing high yield potential on a medium sized plant with an upright habit. Excellent uniformity in sprout shape and size.

BRUSSELS SPROUT	ΓS	(200-250 seeds/gram) sold by seed count
MID SEASON		
Abacus F1 syngenta		Abacus is an early maturing mid-season variety. It is a high yielding variety which produces excellent, dark green, medium size sprouts. Abacus is ideal for hand and machine harvest. HR: Foc:1.
Crispus F1 syngenta	TopRes	Crispus has resistance to most races of Club Root. It is an early to medium maturing variety for the mid-season with strong field holding ability. Crispus is high yielding and produces smooth high quality sprouts. HR: Pb:0,1,3.
Cyrus F1 syngenta		Cyrus is a medium maturing mid-season variety. It has high yield capabilities. Cyrus sprouts have a small butt, a consistent size grading and are of outstanding quality. HR:Foc:1
Gladius F1 syngenta		Gladius is a medium maturing, mid-season variety. Oval and firm sprouts, with mild taste. Bush is upright and produces consistent shape and size sprouts. Sprouts are smaller in size, potential for the baby sprout market.
Maximus F1 syngenta		Maximus is a medium maturing mid-season variety. It provides a good plant length with a very nice cylindrical set. Maximus produces high quality sprouts with small butts. HR: Foc:1.
Martinus F1 syngenta		Martinus is a medium to late maturing mid-season variety. Producing firm, medium green, uniform oval shaped sprouts on a medium sized plant.
Lewitus F1 syngenta		Lewitus is a medium maturing mid to late season variety. Lewitus bush has a upright plant habit. Producers medium green, oval, solid sprouts.
Gigantus F1 syngenta		Gigantus is a medium to late maturing variety for the mid to late season. It is a very vigorous variety which requires reduced nitrogen inputs. Gigantus produces large quantities of uniform medium size sprouts.
Cobus F1 syngenta		Cobus is an early maturing late season variety. Excellent quality sprouts with a rounded shape and nice green colour. Compliments other late season varieties by offering a slightly earlier pick.
LATE SEASON		
Cobelius F1 syngenta		Cobelius is a late season variety with early to medium maturity. Sprouts are green in colour, oval in shape. Sprouts are dense and firm which results in greater weight and ultimately higher yields. Bush is strong, upright and de-leafs well.
Albarus F1 syngenta		Albarus is a medium maturing late season variety. It produces high quality, firm, well filled sprouts which are very uniform and provide a mild taste.
Batavus F1 syngenta		Batavus is a medium maturing late season variety with very good frost tolerance. Produces excellent quality, dark green, medium sized sprouts. Good plant length with very nice cylindrical set. Excellent plant sturdiness and uniformity.
Cryptus F1 syngenta	TopRes	Cryptus produces very uniform high quality sprouts with excellent field holding ability. It is a medium maturing variety for the late season. It has resistance to most races of Club Root. HR: Pb:0,1,3
Petrus F1 syngenta		Petrus is a late season variety, with medium maturity and good holding ability. Sprouts are very dark green in colour, good quality, highly uniform and easy to hand pick. HR: Foc1
Profitus F1 syngenta		Profitus is a medium maturing late season variety. Its strong sturdy plant grows taller than most in the late season producing very high yields of uniform firm green sprouts with a round shape.
Trimstar F1 syngenta		Trimstar is a medium maturing, late season variety. Round, dark green coloured sprouts with a very dense head fill. Good uniformity of sprouts on an upright sturdy bush.
Splendus F1 syngenta		Splendus is a late maturing, late season variety. Very dark green coloured sprouts, with an oval shape. Sprouts are tight and uniform, on a dark colour plant.
SPECIALTY		
Frivole Green F1 syngenta		A new type of Brussels sprouts which is a cross between Brussels sprouts and curly kale, for the mid to late seasons. The result is a unique green sprout with frilled edges to the outer leaves.
Frivole Red F1 syngenta		A new type of Brussels sprouts which is a cross between Brussels sprouts and curly kale, for the mid to late seasons. The result is a unique red sprout with frilled edges to the outer leaves.
CABBAGE		(220-270 seeds/gram) sold by seed count
CABBAGE - GREEN		(220-520 seeds/gram) sold by seed count
Kilaplon F1 syngenta	TopRes	Kilaplon is 4.5-6kg white cabbage with resistance to most races of Club Root. It is suitable for warm to cool season harvesting. Kilaplon has a large plant frame with reasonable thrip tolerance. Not suited to spring harvest. It is ideal for fresh market and processing markets. HR: Pb:0,1,3.

САВЕ	BAGE		(220-270 seeds/gram) sold by seed count
CABBA	AGE - GREEN		(220-520 seeds/gram) sold by seed count
	Maxfield F1 syngenta	TopRes	Maxfield is approx. 2.5kg white cabbage with resistance to most races of Club Root. It is suitable for warm to cool and cool to cool harvest. Maxfield has a nice round shape, with good internal structure and a sweet taste. HR: Pb: 0,1,3.
	Warrior F1		Warrior is a 2.5 to 4.5kg white cabbage. It is suitable for warm to cool and cool to cool production. Warrior produces flat round heads with a small core and excellent internal structure.
CABBA	AGE - RED		(220-520 seeds/gram) sold by seed count
	Remala F1 syngenta		Red cabbage, approx. 2kg. Suitable for all year round production. Remala has shown improved bolting tolerance versus some standards and has a very long field standing ability. Good internal structure with excellent round head shape. Fusarium tolerant. HR: Foc:1
NEW	Riva F1 syngenta		A new red cabbage, with very a deep red/purple colour throughout. High yield potential, with very good crop uniformity and heavy heads, approx. 2.5-3.5kg. Fusarium tolerant. HR: Foc:1
CABBA	AGE - SAVOY		(220-520 seeds/gram) sold by seed count
NEW	Atractum F1 syngenta		Atractum F1 is a new savoy cabbage from Syngenta. Displays good field holding ability on a medium to large frame size. Early maturing compared to standard and high yield potential. Excellent fill and uniformity of head size and shape.
NEW	Cordesa F1 syngenta	TopRes	Cordesa is a blue-green coloured, heavily savoyed cabbage from Syngenta. Large plant frame with upright habit and easy to harvest heads. Small core with excellent head fill and uniformity. Industry first triple resistance package, having genetic defence against Club Root, Ringspot and White Blister. HR: Pb:0,1,3, IR: Ac, Mb
CAUL WHI1	LIFLOWER - FE		(220-290 seeds/gram) sold by seed count
	Aerospace F1 syngenta.		A hybrid cauliflower from Syngenta for shoulder season harvest. Large sturdy upright frame with good curd protection. Smooth dense white curd, flat dome shape and nice tuck. Excellent results in WA with exceptional uniformity to maturity.
	Akara F1 syngenta		A hybrid cauliflower for shoulder/cool season harvest. Dense, smooth white curds with good field holding ability. Excellent curd protection.
	Amerigo F1 syngenta		Amerigo is suitable for warm season production. It has a medium sized frame and good internal protection. Amerigo has a vibrant, dense white curd which is suitable for fresh market production.
	Brittany F1		Autumn/Spring/Early Summer cut in Southern Australian regions, approx. 12-13 weeks, good vigour, upright and adaptable. Curd is well covered and protected from the sun. Very good versatile winter variety in South East Queensland. Perfect for fresh market and processing.
	Clarify F1 syngenta	TopRes	A hybrid cauliflower with resistance to most races of Club Root for summer production in Stanthorpe, Qld. Semi-upright habit with a medium size frame. Well protected dome shaped head with a white curd weighing up to $1.2-1.5$ kg. Relatively quick to mature with very good uniformity. HR: Pb:0,1,3
	Clarina F1 syngenta	TopRes	Clarina has resistance to most races of Club Root and is suitable for autumn production. It has a semi-erect plant habit with good internal protection. Clarina produces firm, dense, high quality white curds.HR: Pb:0,1,3
	Claforsa F1 syngenta.	TopRes	A hybrid TopRes white cauliflower from Syngenta. Medium to large, semi-upright frame with good uniformity to maturity. Claforsa has resistance to most races of Club Root. HR: Pb:0,1,3
NEW	Cleozil F1 syngenta	TopRes	A hybrid white cauliflower with resistance to most races of club root for warm season harvest from Syngenta. Extremely uniform variety with high yield potential, on a medium, upright frame. Smooth white curd, with attractive presentation for fresh market. HR: Pb:0,1,3
	Draconis F1 syngenta		A reliable cauliflower for autumn and spring harvest. Large upright plant with great field holding ability. Outstanding curd protection with very high yield potential. Quick maturing variety, with CMS breeding it is also extremely uniform.
	Gohan F1 syngenta		A hybrid cauliflower for summer and autumn harvest. It has a strong frame with an excellent internal wrap. Produces an outstanding quality, dense, bright white curd that has a nice tuck. Strong tolerance to tip-burn.
	Highfield F1 syngenta	TopRes	Highfield has resistance to most races of Club Root and suitable for warm season production. It produces a high quality, smooth, white curd. Highfield has a medium size plant frame and internal protection. HR: Pb:0,1,3
	Monarch F1 syngenta. A germination room is required this variety to achieve best resul	ts.)	Monarch is suitable for shoulder and cool season production. It is very adaptable in varying conditions with good internal protection. Monarch produces smooth, white, dense curds suitable for fresh market.
	Raleigh F1 syngenta		Raleigh is suitable for warm season production. It has a non-pinking gene to prevent seasonal curd discolouration. It has medium internal protection, a smooth white curd and excellent uniformity to maturity.

Sowing your Success

	LIFLOWER - DURED	(220-290 seeds/gram) sold by seed count
	Clementine F1 syngenta	A hybrid bright orange cauliflower from Syngenta. The vibrant coloured curd is a very intense orange with excellent colour uniformity. Best harvested from mid spring to mid autumn.
NEW	Dark Vader F1 syngenta	A new purple hybrid cauliflower from Syngenta with an improved darker purple colour. Best performance in cooler conditions.
	DePurple F1 syngenta	A purple hybrid cauliflower from Syngenta with a medium frame, and good uniformity. Smooth, dense purple curds. Best performance is in cooler conditions.
	Flame Star F1	An orange cauliflower from Syngenta with a large plant frame, and semi upright habit. Smooth, light orange curds with medium density and dome shaped head.
	Graffiti F1 syngenta	A purple hybrid cauliflower from Syngenta with upright growth habit for easy harvest. Graffiti can be harvested at different maturity stages, performs best in warmer conditions. Colour intensifies with higher light levels.
	Green Storm F1 syngenta	An exciting lime green cauliflower from Syngenta for spring and autumn harvest. Uniform plants with an upright habit. Good curd density and tuck.
CHIN	IESE CABBAGE	
CHINE	SE CABBAGE - GREE	EN (220-320 seeds/gram) sold by seed count
NEW	Annie F1	A new large sized Chinese cabbage that reliably produces 2-3kg barrel shaped heads. The wrapper leaves of Annie provide good head protection, while internally the head has a nice yellow colour and is quite tolerant to tip-burn. Well suited to summer, autumn and winter production.
	Kilakin F1 syngenta	Kilakin is a Chinese cabbage with resistance to most races of Club Root. It produces dark green outer leaves, has a classic shape and very nice internal structure. An excellent option for growers with Club Root problems. HR: Pb:0,1,3
	Yuki F1	Relatively slow bolting variety, with uniform maturity. Dense internal structure. IR: some Australian races of Club Root.
CHINE	SE CABBAGE - RED	(220-520 seeds/gram) sold by seed count
	Hallasan F1	Outstanding quality Red Chinese Cabbage with beautiful internal bright pink/red leaf colour and pale pink stems. The leaves have a crunchy texture, a mild sweet flavour and excellent shelf life. Medium to large size heads with a uniform cylindrical shape. Best grown outside of the main bolting pressure periods for Chinese cabbage.
	Jirisan F1	Robust Red Chinese Cabbage, medium to large size with a uniform cylindrical head shape. Pale red outer leaves with medium pink/red internal colour. Good tolerance to bolting. Perfectly suited as both a fresh salad ingredient or for use in Asian style cooking.
KALE	- BABY LEAF	(250-350 seeds/gram)
	Baby Curled	An improved green curly kale variety for babyleaf production. Nice mid green colour with attractive curled leaf margin and 3D shape. Good vigour for reliable crop establishment, slightly earlier maturity, good yields and extremely uniform crop.
	Baby Tuscan	A much improved Tuscan kale variety for baby leaf production. It is very dark green in colour with quite savoyed leaves. This variety is perfect for the premium baby kale market.
NEW	Kremlin F1	A new hybrid generation of Red Russian baby leaf kale with outstanding hybrid uniformity and durability. Attractive, serrated edged medium green kale with a vibrant red stem. Very thick leaf with medium stem attachment. Upright habit with excellent early vigour.
	Purple Russian F1	Sensationally dark purple coloured hybrid baby kale. Finely serrated leaf with a fine stem attachment and outstanding uniformity. Thick leaf with great durability and improved shelf life for processing. Very similar leaf shape to traditional Red Russian kale, making it ideal for specialty baby leaf mixes.
	Red Russian	Attractive, frilly edged green kale with a vibrant red stem. The plant can grow relatively large if left to develop, but it is usually harvested small and cut for baby leaf. Prized for high anti-oxidant levels.
KALE	- BUNCHING	(250-350 seeds/gram) sold by seed count
	Kobolt F1 syngenta	A dwarf dark green hybrid borecole (curly) kale. Plants are sturdy and upright, approx. two thirds the height of regular borecole kale. Large leaves with shorter stems, ideal for bunching or processing markets.
	Midnight Magic	Midnight Magic is a Tuscan kale (also known as black cabbage) which has been specifically bred for the premium bunching market. It has vibrant dark green leaves with a long slender shape and heavy savoy texture.

KALE - BUNCHING	(250-350 seeds/gram) sold by seed count
Tuscany	An improved selection of Tuscan kale for bunching. It's leaves are noticeably darker green than Toscano and the plant has better bolting tolerance.
Winnetou F1 syngenta.	A dark green hybrid borecole (curly) kale with very good holding ability and winter hardiness. Good quality leaves with a dark blue-green colour, leaves are thick with a very curly shape.
Toscano Black	Toscano Black is a Mediterranean or Tuscan kale, with heavily savoyed, dark green leaves, with a long and slender shape. Toscano can be harvested at the baby leaf stage, but also grown to a bunching stage.

Club Root Resistance Disclaimer: The Syngenta resistance against Club Root is effective against the predominant races Pb:0 and Pb:1 and against the less frequent race Pb:3 but not against the infrequent race Pb:2 that may occur in some fields. Genetic resistance is only one of the tools to manage Club Root. Culture measures such as liming, use of fertilizers with high percentage of calcium, proper drainage, good crop hygiene management are several of important components of an integrated approach to manage the disease. We always recommend to first execute small variety trials before starting commercial production of a new variety.

BABY LEAF ASIAN GREENS	(250-600 seeds/gram)
Mizuna	Vigorous growth with upright habit. Attractive serrated leaves. Used for salad mix.
Mizuna - Flame Trees	Deeply serrated red leafed mustard variety for baby leaf. Attractive upright stems and mild flavour.
Mizuna - Purple Glory F1	A hybrid mizuna with a purple leaf face and green underside. Very upright growth habit, fine in shape and nicely serrated. Purple Glory F1 is a very attractive product, perfect for a vibrant salad mix.
NEW Mizuna - Springbok	An exciting new green mizuna with a thick leaf, thick stem and very high yielding. Dark green leaves with a serrated shape. Upright habit with high vigour, excellent uniformity and durability.
Tatsoi	Dark green, savoyed tatsoi, paddle shaped leaves. Used for salad mix.
Tatsoi - Deep Purple F1	Deep purple coloured hybrid tatsoi, to bring some colour variation into the mix. Excellent shelf life. Colour is best in the cooler months. Market leader in this segment.
Tatsoi - Puma	A dark glossy green tatsoi for baby leaf. Puma has excellent vigour, good uniformity and can be used all year round. Its impressive colour, slight savoy texture, upright plant habit and nil leaf cupping make it a perfect addition to any salad mix.
Mustard - Miztique F1	An exciting dark purple mizuna shaped hybrid mustard. Producing intense colour on both sides of the leaf, this baby leaf variety is absolutely unique and the first of its kind. The bold colour and mild mustard flavour is also well suited to the micro-herb market.
BEET/CHARD - BABY LEAF	sold by seed count (50-120 seeds/gram)
Bull's Blood	Dark red leaf beet for baby leaf production. Very uniform plant with upright habit. For best results use in cooler periods. Great addition to salad mix range with exceptional colour contrast.
Excel F1	An outstanding hybrid chard for baby leaf with very glossy dark green leaves, dark red veins and stems. It has excellent vigour and uniformity and its overall quality is outstanding. Suited for use all year round.
Galactica F1	A hybrid chard for baby leaf with exceptional winter vigour. It has a mid to dark green leaf with a bright red stem and an attractive three dimensional shape. IR: leaf spot and Downy mildew.
Indie	A highly uniform chard for baby leaf. It has a mid to dark green paddle shaped leaves, the stem is bright red and very uniform through the crop. Good vigour, well suited for spring, summer and autumn harvesting.
Locky F1	A very glossy, thick & uniform hybrid chard for baby leaf. Medium to dark green leaves with a bright red stem. Thick leaves and strong vigour offer high yield potential.
Ruby Queen	Dark green leafed beet with intense maroon vein for salad mixes. Very thick leaf with great shelf life. Suitable to all year round baby leaf and salad mix production.
KALE - BABY LEAF	(250-350 seeds/gram)
Baby Curled	A improved green curly kale variety for baby leaf production. Nice mid green colour with attractive curled leaf margin and 3D shape. Good vigour for reliable crop establishment, slightly earlier maturity, good yields and extremely uniform crop.
Baby Tuscan	A much improved Tuscan kale variety for baby leaf production. It is very dark green in colour with quite savoyed leaves. This variety is perfect for the premium baby kale market.
NEW Kremlin F1	A new hybrid generation of Red Russian baby leaf kale with outstanding hybrid uniformity and durability. Attractive, serrated edged medium green kale with a vibrant red stem. Very thick leaf with medium stem attachment. Upright habit with excellent early vigour.
Purple Russian F1	Sensationally dark purple coloured hybrid baby kale. Finely serrated leaf with a fine stem attachment and outstanding uniformity. Thick leaf with great durability and improved shelf life for processing. Very similar leaf shape to traditional Red Russian kale, making it ideal for specialty baby leaf mixes.
Red Russian	Attractive, frilly edged green kale with a vibrant red stem. The plant can grow relatively large if left to develop, but it is usually harvested small and cut for baby leaf. Prized for high anti-oxidant levels.
LETTUCE	
LETTUCE - BABY LEAF	(Raw seed) sold by seed count (900-1100 seeds/gram)
Celtic	Green oak for baby leaf production. Upright habit, fine attachment with a strong durable leaf. A true standard and a must have in your mix. IR: Bl1-11,13,15,17

LETTUCE	
LETTUCE - BABY LEAF	(Raw seed) sold by seed count (900-1100 seeds/gram)
NEW Chianti	Dark red baby leaf rocket/mizuna shaped leaf lettuce with a serrated frilly margin. Durable leaf with a thick mid-rib for added sturdiness. Its narrow leaf shape blends nicely with other leaves and minimises damage when processing. Chianti's intense red colour contrasts perfectly with green salad leaves. IR: Bl16-36
Kerrita syngenta	A baby leaf red butter-cos. The leaf shape and texture is comparable to multi-leaf butter lettuce but has the sturdiness of baby cos. Intense deep red colour at the leaf tip, changing to green at the base. HR: BI16-36, Fol4
Mellita syngenta	Vigorous green cos for baby leaf. Mellita has a vibrant green colour with a very uniform leaf shape and medium to fine stem attachment. Its slightly savoyed texture and thick leaf gives this variety a high yield potential. HR: Bl16-35 IR: LMV1
Mesclita syngenta	An exciting finely incised dark green coral lettuce for direct sown baby leaf. It has an upright habit with strong dark green leaves providing excellent field holding ability and shelf life. The leaves are narrow in shape with exceptional uniformity giving very high yields. HR: Bl16-36, Nr0
Red Crispita 2 syngenta	Red Crispita 2 is a new improved version of the original Red Crispita with improved uniformity. It is a deep red baby leaf coral lettuce for direct sowing. Strong, thick leaves similar to that of a transplanted product. Intense leaf colour with excellent leaf shape and size uniformity. Deeply incised fine frilly leaf shape. Appealing colour for any salad mix. HR: BI16-36, Fol1,4
Rockita syngenta	A new medium to dark green baby leaf coral lettuce, with medium vigour with incredibly uniform leaf size and shape. The slight curled shape of the stem gives the leaf a truely 3 dimensional shape, which will bulk out salad mixes very well. Firm and durable leaf, whilst still very palatable with a pleasant flavour with no bitterness. HR: Bl16-36, TBSV
NEW Saxon	A deep red oak for baby leaf production. Dark colour with glossy and thick ribbed leaves. Leaves are thick and durable, with great crop uniformity. IR:Bl16-36
Skippy	A dark green cos with very upright habit and a lightly savoyed leaf. Skippy is perfect for use as cut leaves, either as a baby or mid-size leaf in salad mix or as a mature loose-leaf product. IR: Bl17,18,22,24,25,27-33; LMV
LETTUCE - MULTILEAF	sold by seed count (Pelleted)
Canagio syngenta	Canagio is a vigorous green multileaf butterhead variety. It has a high leaf count with a compact habit, narrow stem attachments and excellent leaf uniformity, perfect for salad mix. Canagio is ideal for loose leaf duo salad with Rubagio. HR: BI:16-36, NrO
Studio syngenta	A green multileaf coral lettuce from Syngenta with Anthracnose tolerance. High yield potential and extremely high vigour being a key advantage in cool season. Good uniformity to maturity, with green glossy leaves and excellent eating quality compared with common standards. HR: Bl16-28, 30-32, Mpa
Tallio syngenta	A green coral multileaf lettuce from Syngenta. Tough durable leaves have a deeper green with excellent gloss. Excellent uniformity to maturity. High yielding variety with uniform leaf size and shape. Good bolting tolerance being suitable for year round production. Also suitable for hydroponics. HR: BI16-36, Nr:0
Kromio syngenta	A vibrant red multileaf lettuce from Syngenta with high resistance to Anthracnose. High yielding potential, with upright plant habit and good vigour. Excellent leaf gloss, with tough durable leaves. Leaves are serrated with medium stem attachment. Hr: Bl16-33, Nr:0, Mpa
Prodigio syngenta	A triple red multileaf lettuce with outstanding leaf palatability due to its rounded leaf tips. The durable leaves have an intense red colour which changes to green at the base. This variety has excellent leaf volume due to its 3 dimentional leaf shape. Also suitable for hydroponics. HR: Bl16-36, Nr0
Rubagio syngenta	A vibrant multileaf buttterhead with outstanding vigour. It has excellent colour and leaf shape uniformity. Rubagio is ideal for loose leaf duo salad with Canagio. Also suitable for hydroponics. HR: BI16-36, NrO
LETTUCE - BUTTER & O	AK sold by seed count (Pelleted)
Meteore syngenta.	A dark green butterhead for cool season hydroponic production. Excellent presentation with neat thick wrapper leaves, dense head structure and very good yield. HR: BI16-35
Ruffian syngenta	A green butter lettuce for harvest in the cooler seasons in hydroponics. Uniform head formation, with a neat top and presentation. High vigour and yields well with thick sturdy leaves and good weight. HR: Bl16-36, Nr0, TBSV; IR: LMV1
Sirula syngenta	A green oak leaf lettuce variety suitable for hydroponic and whole head lettuce production. It has vibrant green, incised leaves and provides very good yield returns. HR: BI:16,18-36, Nr:0; IR: LMV1
Tekero 2 syngenta	Tekero 2 the successor to the original Tekero, is a double red oak suitable for year round production in both hydroponics and open field. It performs very well in warm conditions with high yields and good head uniformity. HR: BI16-36, NrO, TBSV

LETTUCE	
LETTUCE - COS	sold by seed count (Pelleted)
Actina syngenta	Actina is a midi green cos which is suitable for warm and shoulder season production. It grows to approx. 25-29cm tall. Actina has strong bolting and tip burn tolerance, is high yielding with outstanding uniformity. HR: BI16-28,30-32, Nr0, Fol1,4
Belendra syngenta	Belendra is a dark red mini cos with green internals. Improved bolting and tipburn tolerance compared to Mordore. It has a classic U-shape head with thick, glossy leaves. Belendra is ideal for the whole head and sleeving markets. HR: BI16-35
Calorina syngenta	Calorina is a medium green mid sized processing cos. Uniform heavy heads with a high leaf count and yield potential. Good bolting tolerance. HR: Bl16-36
Starena syngenta	Starena is a larger mini sized cos with an extremely upright habit. It has excellent uniformity to maturity with high yield potential, and good internal density. Starena has glossy mid green leaf with a savoyed texture. HR: BI16-29,32,34,36, NrO, TBSV, IR: LMV1
Extratos syngenta	A green mini cos suited to the SE Qld climate. Averages a 15-16cm head height with a consistently small core. Dark green heads with medium savoy and uniform shape. Well suited for twin packs and for crates. HR: BI16-28,30-32; IR: LMV1
LETTUCE - ICEBERG	sold by seed count (Pelleted)
Ice Agata syngenta	Ice Agata is a medium to large iceberg lettuce with dense round shaped heads, and excellent uniformity. Medium green head colour with light savoy leaf texture. Flexible variety with great results from mid spring through to mid Autumn. HR: Bl16-29,32,34,36, Fol:1, TBSV
Ice Hielo syngenta	Ice Hielo is a large iceberg lettuce with excellent uniformity for cool season harvest. Very vigorous, large and upright plant with a blistered leaf texture. Dense round shaped heads, with a higher leaf count with good head protection. HR: Bl16-36, Fol1
lcevic syngenta	Icevic is an iceberg variety suitable for cool shoulder season production. It has a large frame with thick, glossy, dark green leaves. Uniformity of shape and size is excellent, with good internal fill and a small core. The large uniform heads make it suitable for both fresh and processing markets. HR: Bl16,18-24,27,28,30-32, Fol1, Fol2
PEA SALAD/SPROUT	(4-6 seeds/gram)
Pea - Sprouting Salad	A cost effective variety for producing pea sprouts. This Dun Pea variety produces shoots with a classic, slightly sweet pea flavour.
Pea - Oregon Sugar Pod II	A true snow pea variety which is also commonly used to produce snow pea sprouts/tendrils. This variety has a true snow pea flavour which is much sweeter than Dun Peas. Available as treated seed only.
ROCKET	
ROCKET - ARUGULA	(Eruca sativa, 450-650 seeds/gram)
Cultivated	Also known as Arugula. Pungent, dark green, oval shaped leaves.
Darkway	A "speedy" rocket variety with outstanding leaf qualities. Its dark green leaves are exceptionally thick giving improved shelf life and are very similar in leaf shape to wild rocket. Darkway has a slower growing habit for improved field holding ability. Sow at high density for best results.
Escort	A 'speedy' rocket variety with medium vigour. Its finely serrated leaf shape is similar in appearance to wild rocket. Escort has a strong sturdy leaf providing excellent processing ability.
Sherman	Dark green, serrated shaped leaves, nutty flavour with medium pungency. Faster growing than wild rocket. Available as untreated seed.
ROCKET - WILD	(Diplotaxis tenuifolia, 3000-4000 seeds/gram)
Emilia F1	A hybrid wild rocket variety. Highly vigorous variety with outstanding dark colour. Extremely uniform fine leaf shape with very few broad leaves. Its faster speed of growth ultimately gives higher yields of excellent quality.
Future	A vigorous wild rocket variety with outstanding dark colour, one of the darkest green varieties we have seen. Finely serrated leaves with excellent uniformity. Sturdy upright plant growth habit makes it ideal for machine harvest.
Nature	A vigorous wild rocket, well suited to winter harvest, but also handles warm weather very well. Nature is the industry standard for wild rocket and has a strong reputation for reliable quality, versatility and vigour.
Protector	A variety of wild rocket which has been bred for mildew tolerance. Protector has a dark green leaf and is uniform in leaf shape while being relatively slow bolting. This variety has quite a strong traditional rocket flavour.

ROCKET			
ROCK	ET - WILD	(Diplotaxis tenuifolia, 3000-4000 seeds/gram)	
	Riddler	Very dark green wild rocket with a medium fine leaf. Upright habit and high leaf uniformity. Attractive serrated leaf shape with good durability and thickness. Fairbanks' darkest green rocket, especially suited to Queensland and Western Australia.	
	Romagna F1	One of the first commercially available hybrid wild rocket varieties in the world. Romagna F1 has outstanding vigour in cool conditions, harvesting up to 2 weeks earlier in trials to date. Being a hybrid, leaf uniformity is brilliant and it is very high yielding.	
NEW	Stature	A new very dark green wild rocket. Very thick leaves, with upright habit. In trials to date it has been very slow to bolt compared to other standards.	
	Tarwin	A slow bolting wild rocket variety with a very uniform leaf shape and size. Its thick durable leaves have a highly serrated appearance even on the first true leaf. Consistently the slowest bolting wild rocket in all warm season trials to date.	
	Topshelf	A variety of wild rocket which has been specifically bred for increased post-harvest shelf life. It has very dark green leaves with excellent leaf shape and size unifomity. Breeder also reports an increased tolerance to Downey mildew. Best suited to shoulder season production.	
SPIN	IACH	(60-120 seeds/gram) sold by seed count	
	El Bravo F1 syngenta	El Bravo is a very dark green spinach for baby leaf production from Syngenta. Paddle shaped thick leaves, making it very durable and processed well. Great results to date throughout spring. HR: Pe1-7, 9-17, Sb	
	El Furio F1 syngenta	El Furio is the market leading summer harvest baby leaf spinach variety, with best in class performance for the baby leaf market. Very dark green leaves with a semi-upright plant habit. El Furio has excellent leaf durability and toughness, with very thick leaves. HR: Pe1-7,9-17, Sb	
NEW	El Giga F1 syngenta	El Giga is a new cool season harvest hybrid spinach from Syngenta. Pointed oval leaves with great vigour and upright habit. Mid green colour with high yield potential. HR: Pe1-18, Sb	
	El Lucio F1 syngenta	El Lucio is a mid to dark green hybrid spinach for spring and autumn harvest in S.E. QLD. Oval shaped leaves with an upright habit and good vigour. El Lucio has a slight savoy texture, and medium gloss. HR: Pe1-7,9-19, Sb, IR: Pe8	
NEW	El Madison F1 syngenta	A new hybrid baby leaf spinach for the warm shoulder season. El Madison has an upright habit with a semi- savoy leaf texture and exceptionally dark green colour. Thick durable leaf with high yield potential and good field holding ability. HR:1-7,9-19, Sb	
NEW	El Olah F1 syngenta	El Olah is high yielding variety for warm and shoulder season harvest. Upright plant habit with a medium savoy leaf texture and medium green colour. It has excellent leaf durability and toughness, with very thick leaves. HR: Pe1-7,9-19, Sb	
	El Prado F1 syngenta	High yielding spinach for the baby leaf market. Medium green leaves with vigorous upright growth habit. Uniform, strong, paddle shaped leaves with a light savoy and medium gloss. Best suited to the cool season. HR: Pe1-7,9-17, Sb, IR: Pe8	
	El Ganto F1 syngenta	El Ganto is a high yielding hybrid spinach for the baby leaf market. Vigorous upright growth habit with good uniformity. Medium green, strong, paddle shaped leaves with a light savoy and medium gloss. Best suited to the cool shoulder and winter seasons. HR: Pe1-6,8-17, Sb, IR: Pe7	
	Pungi F1 syngenta	Vigorous dark green hybrid spinach for cooler season production. Leaves are round in shape at the baby stage and are thick and durable. Great baby leaf uniformity, stem length is slightly longer than average, with an upright habit.HR: Pe1-12,14-16. See page 13 for bunching description.	

ASIAN VEGETABLE	
PAK CHOI - GREEN STEM	(300-450 seeds/gram) sold by seed count
Mini-Pak F1	Mini green stem pak choi ideal for bunching. Uniform size and excellent shape. Dark green, smooth, elongated leaf shape. Upright stems with compact plant habit. High-end finished product, presenting beautifully when bunched.
Miyako F1	An outstanding hybrid green stem pak choi for bunching. Miyako is early to mature, compact and suitable for all seasons. Miyako is renowned for its fantastic dark green colour and uniformity. It has good tolerance to bolting and to some Australian races of Club Root. Market leading variety for all segments.
PAK CHOI - WHITE STEM	(300-450 seeds/gram) sold by seed count
Joi Choi F1	Slow bolting, early maturing white stem pak choi. Also known as Bok Choi, market leader for this segment.
CHOY SUM	(300-450 seeds/gram)
NEW Jujitsu F1	Hybrid choy sum for the bunching market. Incredibly dark glossy leaves with medium savoy texture. Semi open growing habit with a mid green stem colour. Outstanding crop uniformity.
CHINESE BROCCOLI (KAILAAN) - STEM TYPE	(150-250 seeds/gram) sold by seed count
Frank F1	Hybrid stem type Chinese broccoli (Kailaan). Slightly slower maturing than Bruce F1, giving good harvest flexibility. Produces thick tender stems with rounded green leaves, excellent uniformity. Best suited to cooler seasons, but can be harvested all year round.
CHINESE BROCCOLI (KAILAAN) - LEAF TYPE	(150-250 seeds/gram) sold by seed count
Gazza F1	Hybrid leaf type Chinese broccoli (kailaan). Dark green and glossy leaves with a slightly pointed paddle shape. Medium sized leaves on a short main stem, ideal for bunching. Very uniform growth rate, allowing a one-pass harvest.
Pointed Leaf	Open polinated leaf type kailaan, also known as Chinese broccoli. Dark green leaves with a slightly pointed shape. Traditional variety, well suited for bunching.
ARTICHOKE	(15-20 seeds/gram) sold by seed count
Imperial Star	Early maturing variety for fresh market. Green chokes with a slight purple tinge. In Southern Australia, Imperial Star is usually grown as an annual, sowing in spring and harvesting through the following winter.
Imperial Star 2	An improved selection of the original Imperial Star. Imperial Star 2 is a vigorous plant with a medium to open habit producing elongated globe shaped heads with a slight purple tinge. 'Seed available 2023'
Red Crown F1	A hybrid red artichoke for the fresh market. Produces beautiful globe shaped deep red artichokes on a large and vigorous sturdy bush. Very tender to eat with a nice sweet flavour.
ASPARAGUS	(40-50 seeds/gram)
DePaoli (UC 115) F1	Well suited for early production of fresh asparagus in warm climates. Very similar in appearance to UC 157, tight spear heads on a tall stem. Seed is imported for confirmed orders only.
Early California F1	Early California is most suited to production in arid / semi arid growing areas. As the name suggests, it is one of the first varieties to produce spears in the spring, this is because of a low requirement of natural chilling in the winter. Seed is imported for confirmed orders only.
Pacific Purple F1	A deep purple coloured asparagus variety with high and exceptional flavour. The spears are significantly sweeter than the green varieties and are generally very uniform in appearance. It can produce some very thick spears, reducing plant spacing can help limit this if required. Seed is imported for confirmed orders only.
UC 157 F1	Standard F1 hybrid asparagus, widely used in the main production areas of Southern Australia and around the world. Produces uniform deep green spears, with high yield potential. Seed is imported for confirmed orders only.
BABY BUNCHING BROCCOLI	(150-270 seeds/gram) sold by seed count
Matrix F1 syngenta	An exciting sweet baby broccoli for bunching, designed for multiple picks, increasing yield potential. This baby bunching broccoli is a loose head type, with a sweet and tender stem that forms highly attractive bunches, rivalling the current market standards.
CHARD /SILVERBEET	(30-100 seeds/gram) sold by seed count
Vibrance	A multi-coloured chard variety for the bunching market. Its range of colours includes white, magenta, yellow, pink, red and orange. This striking chard is visually spectacular when bunched.

	FRICES GOT EXCEUSIVE
CHARD /SILVERBEET	(30-100 seeds/gram) sold by seed count
Silverton	A compact, one cut silverbeet for the sleeve market. Uniform dark green blistered foliage with white stems, plant height approx. 35-40cm. Not recommended for growing in regions with severe frosts.
ENDIVE	sold by seed count (Pelleted)
Bessie syngenta	Large Frisee type endive. Medium green colour with yellow internals, high yielding and very good field holding ability. Excellent bottom quality when cut as whole head. Very nice semi-serrated and incised leaf shape with narrow veins.
Pandie syngenta	Medium to large Frisee type endive. Dark green in colour with heavily serrated leaves. Strong tolerance to tip-burn.
Smittie syngenta	A vigorous endive with an upright habit for bunching. Smittie has broader leaves with a medium green colour, it typically has less stem bronzing and lower leaf discolouration than other varieties. Best suited to autumn, winter and spring harvest.
HERBS	
BASIL	(650-950 seeds/gram)
Genova Large Leaf	Genovese type with large, dark green leaves with a slightly savoy texture. Market leading variety, due to its yield, flavour and beautiful aroma.
Aroma F1	A hybrid Genovese type, leaves are dark green, mid sized and aromatic. IR: Fusarium wilt (Fob)
Godzilla F1	A semi-compact Prospera type basil with downy mildew and fusarium resistance . Very dark green leaves with good uniformity. Plant has a compact habit with large leaves, well suited to bunching, potted and sleeved basil production. IR: Downy mildew Pb(DM-0), Fob
Greek	An interesting basil with a ball shaped habit when mature. The plant has smaller leaves than standard basil, generally a lighter colour and more of an aniseed flavour. Well suited to micro herb production and perfect for garnishing.
King Kong F1	A compact Prospera type basil with downy mildew and fusarium resistance . Very dark green leaves with good uniformity. Plant has a very compact habit with medium to large leaves, best suited to potted basil production. IR: Downy mildew Pb(DM-0), Fob
Prospera® F1	A hybrid basil variety bred specifically for resistance to Downy mildew (Pb) and Fusarium wilt (Fob) . Leaves are medium to large in size with a dark green colour with a traditional sweet basil aroma and flavour. Certified Organic seed. Prospera® F1 is protected internationally by Plant Breeders Rights. IR: Downy mildew Pb(DM-0), Fob
Purple Fire	A premium purple leaf basil with excellent uniformity. Perfect for pot production and micro herbs. Excellent uniformity at the micro leaf stage with deep purple coloured cotyledons and nice glossy true leaves.
Siam Queen	A large leaved Asian type basil with aniseed flavour. Dark leaf colour with medium vigour.
Thai	Asian type basil with a stronger aniseed flavour. Leaves are more pointed than Western type basils, with a lighter leaf colour and purple flowers borne on a longer spike. Popular in Asian cooking.
CORIANDER	(30-100 seeds/gram)
Santo	Fairbanks' market-leading variety of slow bolting coriander. Santo can be grown year round in most areas. Santo is indexed free of Coriander Leaf Blight, to ensure the best possible seed for growing.
Santo Mono-Germ	Fairbanks' market-leading strain of slow bolting coriander available in Mono-Germ form. This helps to improve seeding density accuracy.
HERBS	
Amaranth - Red Garnet	Amaranth is a stunning deep red microgreen with a beetroot like flavour. Bright pink/red stem colour, with slender elongated cotledons. Excellent micro herb for use as a garnish. <i>Amaranthus caudatus</i> (approx. 1,600 s/gm)
Chervil - Curled	Curled Chervil produces fragrant, small leaves on a stemmed plant. Chervil is not unlike parsley at first appearance, but with sweeter and smaller leaves. <i>Anthriscus cerefolium</i> (400 - 550 s/gm)
Chives - Garlic	Garlic chives have a similar habit to regular chives but have flat leaves and a strong garlic taste. This variety has a darker green colour compared to other varieties and is also well suited to micro-herbs. <i>Allium tuberosum</i> (800-900 s/gm)
Chives - Medium Onion	Commonly called onion chives, this variety produces dark green cylindrical stems, approximately 20cm tall. Can be grown as a perennial, as they die off in winter and shoot again in spring. <i>Allium schoenoprasum</i> (800-900 s/gm)

HERBS		
Corn Salad - Mache	French vegetable, grown for baby leaf or micro greens. Spinach-like growth habit, with a delicate and nuttier flavour than spinach. Mache continues to thrive through cold temperatures. Valerianella locusta (400-450s/gm)	
Cress - American Upland	Cress with dark green broad leaves, growing on a stem. The plants usually grow to about 20cm tall. Does not require as much moisture to grow as watercress. <i>Barbarea verba</i> (500-600 s/gm)	
Cress - Curled Wasabi	Dark green plant, borne on single stems. Curled Wasabi cress has a spicy flavour and is used in micro-herbs and salads. <i>Lepidium sativum</i> (500-600 s/gm)	
Dill - Bouquet	Bouquet is the original market standard dill. The attractive, dark green plant produces delicate looking leaves, borne on long stems. <i>Anethum graveolens</i> . (800-850 s/gm)	
Dill - Dilligence	An improved dill variety compared to the market standard. Dilligence is darker green with thicker leaves and stems, leading to improved yields, appearance and shelf-life. <i>Anethum graveolens</i> (800-850 s/gm)	
NEW Dill - Dillight	Vigorous dark green dill with attractive sturdy upright habit. Great vigour and very uniform. Suitable for year round production.	
Dill - Palatine	A dill variety with excellent colour and uniformity. Palatine has dark green glossy colour with strong vigour. Well suited to field production, suitable for year round production. <i>Anethum graveolens</i> (800-850 s/gm)	
Dill - Plain	Common dill with a medium green colour. Leaves are very fine and delicate. Suitable alternative to Bouquet. Anethum graveolens. (800-850 s/gm)	
Fenugreek	Medium to dark green leaves with elongated narrow oval shaped leaves. Fenugreek has a strong curry type aroma and similar flavour. <i>Trigonella foenum-graecum</i>	
Lemon Balm	A delicate herb with a flowery lemon flavour. The leaves are heart shaped and similar in appearance to spearmint. An excellent micro herb product. <i>Melissa officinalis</i> (1200-1500 s/gm).	
Lovage	Light green coloured leaves, a little similar in shape to a flat-leaf parsley. The flavour is savoury and comparable to celery or parsley, it can be used in place of parsley in a wide range of dishes. Levisticum officinale (300-400 s/gm).	
Marjoram - Sweet	Cold sensitive herb that can be grown as a perennial in warmer areas. The plant grows to about 30cm tall and bears small, fragrant dark green leaves. <i>Origanum majorana</i> (1200-1500 s/gm).	
Mint - Peppermint	Peppermint (<i>Mentha Piperita</i>) has a distinctive flavour and is well known for its medicinal properties. Excellent as a micro herb. Not to be confused with "Spearmint" (Mentha spicata). (Approx. 12,000 s/gm)	
Orach - Red	A dark red/purple orach with vibrant leaf colour, primarily used for sprouting and micro-herbs. Bright pink stems with red/purple leaves. Orach has a pleasant spinach-like flavour. <i>Atriplex hortensis</i> (Approx. 250 s/gm)	
Oregano	Distinctive small green shrub which is grown as a perennial in most regions. After flowering, the plant can be cut right back to the base and it will shoot again. <i>Origanum vulgare</i> (800-1000 s/gm).	
Sage	Very attractive herb with silvery green leaves. Upright, high yielding plant that can be grown as a perennial in mild areas. Salvia officinalis (120-130 s/gm)	
Shiso - Green	A common Asian herb also known as Perilla. It has an anise flavour with hints of cinnamon. Well suited for micro herb production. <i>Perilla frutescens</i> (approx. 270 s/gm)	
Shiso - Red	A common Asian herb also known as Perilla. Red Shiso has an anise flavour and is slightly less spicy than the green variety. Well suited for micro herb production. <i>Perilla frutescens</i> (approx. 270 s/gm)	
Sorrel - Micro Vein	A variety of red veined sorrel specifically selected for its perfect appearance at the micro-herb stage. As a micro, its leaves have a distinct red veins and a refreshing citrus taste. <i>Rumex sanguineus</i> (1200-1500 s/gm).	
Sorrel - Red Veined	Red veined variety with bright green leaves. Refreshing, citrus sour taste. Leaves have a slight savoy texture and are very attractive as a garnish. <i>Rumex sanguineus</i> (1200-1500 s/gm).	
Thyme - Winter	Woody, branching perennial herb that dies back in autumn but shoots again in spring. <i>Thymus vulgaris</i> (5000-6000 s/gm)	
Watercress - True Water	Perennial herb with large rounded leaves. Traditionally grown in hydroponics, watercress prefers high soil moisture content for best growth. <i>Nasturtium officinale</i> (4500-6000 s/gm)	
Tarragon - Mexican	A perennial herb that grows to approximately 50cm-60cm tall. Similar flavour to French Tarragon and easier to grow, but less pungent than Russian Tarragon. <i>Tagetes lucida</i> (500-700 s/gm)	

HERBS	
PARSLEY	(500-600 seeds/gram)
NEW Absinthe	Flat leaf parsley with very dark green glossy leaves, with attractive sturdy upright habit. Larger leaves than standard, with a very uniform crop. IR: Sp (Septoria leaf spot)
Italian Giant Parsley	Traditional Italian flat leaf parsley, with large dark green flat leaves on strong upright stems.
Limerick	Triple curled variety, excellent dark green colour, uniform leaf texture, colour and flavour. Limerick is the market standard triple curled variety for parsley growers.
Midori	Italian Giant type parsley. Large deep green leaves on a strong plant. Excellent uniformity of leaf size and shape.
Shamrock	Italian flat leaf type with slightly smaller true leaves than other varieties. Attractive green, pointed cotyledons.
Verdant	Italian Giant type parsley, now recognised as the market standard for green flat leaf parsley. Medium to large sized leaves, vigorous plant with excellent fragrance.
KALE - BUNCHING	(250-350 seeds/gram) sold by seed count
Kobolt F1 syngenta	A dwarf dark green hybrid borecole (curly) kale. Plants are sturdy and upright, approx. two thirds the height of regular borecole kale. Large leaves with shorter stems, ideal for bunching or processing markets.
Midnight Magic	Midnight Magic is a Tuscan kale (also known as black cabbage) which has been specifically bred for the premium bunching market. It has vibrant dark green leaves with a long slender shape and heavy savoy texture.
Toscano Black	Toscano Black is a Mediterranean or Tuscan kale, with heavily savoyed, dark green leaves, with a long and slender shape. Toscano can be harvested at the baby leaf stage, but also grown to a bunching stage.
Tuscany	An improved selection of Tuscan kale for bunching. It's leaves are noticeably darker green than Toscano and the plant has better bolting tolerance.
Winnetou F1 syngenta	A dark green hybrid borecole (curly) kale with very good holding ability and winter hardiness. Good quality leaves with a dark blue-green colour, leaves are thick with a very curly shape.
ONION - SPRING	(400-500 seeds/gram)
Everlast F1	A strong and vigorous hybrid spring onion for bunching. Very uniform long thick shanks with strong, upright, dark green leaves. Good tolerance to leaf flagging and brown tips. Higher yielding and faster maturing than OP alternatives.
Evermore F1	A high quality hybrid spring onion for bunching. Evermore has a sturdy upright, slender habit with a dark blue- green leaf. The plant has high vigour and is high yielding with excellent uniformity. Strong field holding ability and firm shank. Good tolerance to leaf flagging and brown tips.
Fuyu F1	Vigorous hybrid spring onion best suited for bunching in cool conditions. Fuyu F1 has good uniformity of leaves and shank thickness. It has excellent vigour and high yielding with sturdy upright, slender habit. Very deep green colour with firm shank and strong field holding ability.
Grandstand	Winter harvest spring onion, which as the name suggests, is relatively upright in growth habit. Grandstand has good vigour and bright green cylindrical leaves.
Natsu F1	Natsu is a hybrid spring onion best suited for bunching in warmer seasons. It has excellent uniformity of leaves and shank thickness. Natsu F1 is high yielding with sturdy upright, slender habit. Very dark blue-green colour with firm shank with strong field holding ability
SILVERBEET	(30 - 100 seeds/gram)
Silverton	A compact, one cut silverbeet for the sleeve market. Uniform dark green blistered foliage with white stems, plant height approx. 35-40cm. Not recommended for growing in regions with severe frosts.
SPINACH - BUNCHING	(60-120 seeds/gram) sold by seed count
Pungi F1 syngenta	Vigorous dark green hybrid spinach for bunching, best suited to warm and shoulder season production. Leaves are pointed in shape and are thick and durable. Great uniformity, stem length is slightly longer than average, with an upright habit and great field holding ability. HR: Pe1-12,14-16. See page 12 for baby leaf description.

MICRO-HERB

MICRO-HERB	
Amaranth - Red Garnet	One of the most striking of all micro-herbs. The fluorescent pink stem, topped with silvery pink, elongated cotyledons are the reason this is one of the staples in all micro-herb operations. Mild, spinach like flavour and excellent vigour.
Basil - Genova Large Leaf	Bright green italian Genova type basil with slightly savoy texture. An excellent option for micro-herbs due to its flavour and beautiful aroma.
Basil - Greek	A smaller leaved more compact plant than Italian basil. Green curved cotyledons with small pointed true leaves. Sweeter and more subtle flavour than Italian basil.
Basil - Thai	South-East Asian basil variety with a strong aniseed flavour. Pale green stem becoming dark purple as the plant matures. Narrow pointed true leaves with green cotyledons. Popular in Asian cooking.
Basil - Purple Fire	A premium purple leaf basil with excellent uniformity. Perfect for pot production and micro-herbs. Excellent uniformity at the micro leaf stage with deep purple coloured cotyledons and nice glossy true leaves.
Beet Leaf - Toro Rosso	The successor to True Blood with a similar deep red colour. Dark red coloured beet leaf for micro-herb production.
Broccoli - Sprouting	One of the most popular of all sprouting vegetables, sprouting broccoli is simple to grow. With pale stem and heart-shaped green cotyledons, it's one of the better varieties to start with for beginning growers.
Coriander - Santo	Slow bolting coriander. Santo can be grown year round in most areas. Market leading variety of slow boting coriander. Long oval shaped cotyldons with a grass green colour and beautiful pungent coriander aroma. A truely vibrant micro-herb.
Cabbage - Red Sprouting	Purple stem with dark green leaves and a sweet cabbage flavour. A high vigour micro-herb.
Celery - Sprouting	Delicate small leaves on a fine green stem, with intense celery flavour.
Chervil - Curled	A longer stemmed micro-herb with finely curved green cotyledons. The large, narrow, dark seed coat often remains attached for a striking contrast. It has a sweeter and more delicate flavour than parsley and finer in appearance with a faint aniseed flavour.
Chives - Medium Onion	Long, narrow leaves with a strong onion flavour. Black seed coat remains attached to the leaf tip for an attractive micro-herb.
Chives - Garlic	Dark green cylindrical leaves topped with black seeds and a very strong garlic flavour make garlic chives a popular option with chefs and growers alike. Germinates best under heated conditions.
Corn Salad - Mache	French vegetable, grown for baby leaf or micro-herb. Spinach-like growth habit, with a delicate and nuttier flavour than spinach. Mache continues to thrive through cold temperatures.
Cress - American Upland	Cress with dark green broad leaves, growing on a stem. American Upland Cress has a mild peppery cress flavour.
Cress - Curled Wasabi	Beautifully lobed, fine-leaved, green micro-herb. Curled Wasabi Cress has a spicy flavour and is used in salads, usually eaten raw.
Dill - Dilligence	An aromatic micro-herb with long, slender, green cotyledons with the seed coat often remaining attached. True leaves are fine and feathery. Dried dill will rapidly loose its flavour, so dill is an excellent choice for a fresh micro-herb.
Dill - Plain	Common dill with a medium green colour. Leaves are very fine and delicate. Cost effective alternative to Bouquet and Dilligence. <i>Anethum graveolens</i> . (800-850 s/gm)
Fenugreek	Medium to dark green leaves with elongated narrow oval shaped leaves. Fenugreek has a strong curry type aroma and similar flavour.
Kale - Purple Russian F1	Designed for baby leaf production, Purple Russian kale has purple/green heart shaped cotyledons with feathery green leaves coming after. Leaves are pure purple on the upper surface of the leaf at maturity. Purple Russian is also sweeter and softer than full-sized kale, whilst still providing all the nutritional benefits.
Kale - Red Russian	A frilly leafed specialty kale, mature Red Russian plants have a vibrant purple stem. As a micro-herb, this colour is reduced and only starts to darken up as the plants mature. Red Russian has attractive green cotyledons with delicate frilled first leaves.
Kale - Baby Curled	A frilled baby leaf kale with a mid green colour. Micro-herb has rounded cotyledons with lightly frilled true leaves.
Kale - Toscano Black	Toscano Black is a Mediterranean or Tuscan kale, with heavily savoyed, dark green true leaves. As a microherb, it has green cotyledons with excellent uniformity and a mild flavour.
Kohlrabi - Purple Sprouting	Strong purple stems with dark green cotyledons, sprouting kohlrabi are popular for the perceived health benefits and higher antioxidant levels of cruciferous vegetables. Vigorous and easy to grow.
Kohlrabi - Green Sprouting	With a pale green stem becoming light-pink as the sprout matures, green sprouting kohlrabi is a useful addition to micro-salads due to its higher vigour and ease of germination. Standard heart-shaped brassica cotyledons.

MICRO-HERB

MICRO-HERB	
Lemon Balm	Possibly the most popular of all the micro-herbs. Unlike other lemon-flavoured herbs, which can tend to be sour, lemon balm has a unique sweet lemon flavour which works as well with desserts as it does with savoury dishes.
Lettuce - Red Crispita 2 syngenta	A deep red baby leaf coral lettuce with intense leaf colour with excellent leaf shape. Deeply incised fine frilly leaf shape. Appealing colour for any micro salad mix. HR: Bl1-36, Fol1,4.
Lettuce - Mesclita syngenta.	A baby leaf lettuce with a frilly leaf margin. It has dark green colour and fine leaf shape with a very fine stem. HR: Bl16-36, NrO
Lovage	Lovage has all the elegance of a continental parsley, but sets itself apart with a beautiful strong celery flavour. Vigorous and sweet, Lovage is an excellent addition to soups or salads.
Mint - Peppermint	With a sharp, intense flavour, Peppermint (which contains Menthol) adds a lovely cooling sensation in dishes. Peppermint tends to have larger leaves and more of a creeping habit than Spearmint. Peppermint is extremely tiny seed and slower to establish than most micro-herbs.
Mustard - Miztique F1	A red mizuna shaped hybrid mustard which boasts a beautiful red/maroon colour on both sides of its true leaves, perfect for a micro-salad. It is easy to grow, with a pleasant light mustard hint in its flavour.
Mizuna	Serrated true leaves with attractive pale green cotyledons. Attractive upright stems and mild mustard flavour.
Mizuna - Purple Glory F1	A true hybrid mizuna with a mild flavour. Purple Glory has beautifully serrated true leaves, atop the lovely heart shaped cotyledons all brassicas offer. Dark purple colour on the upper surface of the true leaves, uniform and easy to grow.
Mustard - Red Deer	A fine leafed red mustard used mostly for micro-herb production. Finely serrated true leaves with a mild peppery flavour.
Mustard - Red Dijon	Red mustard with an excellent colour and uniformity at cotyledon stage and a strong mustard flavour. True leaves are dark red and lightly serrated at maturity.
Mustard - Green Dijon	Green mustard for micro herb production with a strong mustard flavour. True leaves are mid green and lightly serrated at maturity.
Orach - Red	Also known as Mountain Spinach, Red Orach is one of the most striking micro-herbs. It has bright pink, almost fluorescent stems and dark pink/red true leaves. A small percentage of green off-types are present. It has a sweet spinach like flavour.
Oregano	A standard in Italian cooking, nothing quite compares to the sweet and pungent aroma of oregano. Seed is extremely small and slower to germinate, but the fine, smooth dark green leaves on this compact and creeping plant make for an attractive rounded pot.
Parsley - Limerick	Triple curled variety, excellent dark green colour, uniform leaf texture, colour and flavour. The standard triple curled variety for parsley growers.
Parsley - Shamrock	Italian flat leaf type with slightly smaller true leaves than other varieties. Attractive green, pointed cotyledons.
Parsley - Verdant	Italian Giant type parsley, the market standard for green flat leaf parsley. Medium to large sized true leaves with neatly pointed cotyledons. Excellent fragrance.
Pea - Sprouting Salad	A cost effective variety for producing pea sprouts. This Dun Pea variety produces shoots with a classic, slightly sweet pea flavour.
Radish - Sprouting Daikon	Sprouting daikon radish has pale green cotyledon and leaves with a light green stem becoming slightly darker as the plant grows.
Radish - Pink Stem	A bright pink, almost purple stemmed radish with green cotyledons for micro-herb production. It has strong vigour and a mild radish flavour. Its striking colour is perfect for brightening up any plate.
Radish - Purple Sango Improved	Specialty sprouting radish with purple stem and leaves for baby leaf or micro-herb production. Despite best efforts, it can have a small percentage of green shoots amongst the purple ones.
Rocket - Sherman	Also known as Arugula. Dark green, serrated shaped leaves, nutty flavour with medium pungency. Faster growing than wild rocket.
Rocket - Darkway	Similar to cultivated rocket in growth speed and flavour, with a serrated true rocket leaf shape. Flavour is nutty and mildly peppery. Very easy to grow.
Rocket - Nature	A vigorous wild rocket with reliable quality and versatility. Fine, very serrated true leaves with small delicate green cotyledons and a strong flavour.
Sage	Normally a woody perennial, Sage has silvery leaves and a beautiful flavour for soups, sauces or even stuffing. Whether you're after a potted herb, a multi-cut product or a single use micro-herb, sage is an excellent addition to your micro-herb range.
Shiso - Green	One of the most popular herbs in Japanese cooking, Green Shiso (or perilla) is slightly spicier with more cinnamon undertones compared with Red Shiso. Curved cotyledons with serrated true leaves.

MICRO-HERB

MICRO-HERB	
Shiso - Red	A difficult flavour to describe, reminiscent of curry powder, with hints of anise, cinnamon and coriander. Fairbanks Red shiso is one of the darkest red and most consistent red shiso variety available. Popular in Japanese and south-east Asian cuisine.
Sorrel - Micro-Vein	Red veined sorrel specifically selected for its perfect appearance at the micro-herb stage. As a micro, its leaves already have distinct red veins and a refreshing citrus taste.
Sorrel - Red Veined	One of the most striking leaves in the whole vegetable industry, Red Vein Sorrel is a lime-green colour with blood-red stem and leaf veins. Flavour is a mild sour-lemon with a juicy stem. As a micro-herb it retains all of the softness and palatability of baby leaf spinach.
Spring Onion - Grandstand	A vigorous growing spring onion with an upright habit and fresh onion flavour. Grandstand has good vigour with bright green cylindrical leaves, often the seed coat will stay attached.
Tatsoi	Dark green, savoyed, paddle shaped true leaves. Dark green cotyledons with a mild mustard flavour. Used for salad mix.
NEW Tatsoi - Purple Heart F1	A hybrid purple tatsoi. Purple Heart has dark purple heart shaped cotyledons, with pak choi shaped leaves. Purple Heart is a fantastic micro purple pak choi product.
Tarragon - Mexican	Mexican Tarragon is normally an upright woody perennial plant with a strong sweet aniseed flavour. As a micro-herb, its fine leaves are popular in many high class restaurants.
Thyme Winter	Thyme has beautiful small leaves on upright stems. Sprigs of thyme, when grown as micro-herbs make for a superior garnish compared with field grown products as they are softer and sweeter without the woody stems of standard Thyme.
Watercress - True Water	Perennial herb with large rounded leaves. Traditionally grown in hydroponics, watercress prefers a high moisture content in its growing medium for best results. Fine cotyledons with a pleasant peppery flavour.

ROOT VEGETABLES

BEETROOT - BUNCHING	(30-100 seeds/gram)	
Chioggia	A specialty bunching beetroot. Also known as 'Target' or 'Candy' beetroot, they have light red skin and beautiful rings inside, like red and white candy stripes. The flesh is very tender, mild and sweet.	
CARROT	(400-1000 seeds/gram)	
Romance F1	An extremely uniform, hybrid Dutch carrot for bunching. Very dark green and healthy tops make for excellent presentation and also a great option for organic production. The roots are smooth, tapered and glossy orange in colour. IR: Ad (Alternaria), Eh (Powdery Mildew)	
ONION		
ONION - BROWN	(220-300 seeds/gram) sold by seed count	
Resolute F1	Long day hybrid brown onion for the very late season. Vigorous tops with very strong root system. Large, firm and uniform bulbs with predominantly single centres. High yielding variety with great storage potential. IR: Pt (Pink root), Foc (Fusarium)	
ONION - RED	(220-300 seeds/gram) sold by seed count	
Griffin F1	Long day hybrid red onion. Deep internal and external red colour, slightly top shaped with good skins, less pungent in flavour, consistent shape and size, extended shelf life, late sowing only in Southern Australia.	
RADISH	(70-140 seeds/gram)	
Easter Egg Mix	A mix of round radish roots that develop in shades of white, pink, red and purple and have a mild, delicate flavour. These radishes are round, glossy and stay crisp and mild even when large. Beautiful presentation when bunched.	
French Breakfast	French Breakfast radish is a small oblong bright red radish with a white bottom and white flesh. These radishes grow quite vigorously with medium sized green tops.	
Radio	Uniform red globe radish with abundant, pale green leaf. Tops are too vigorous in summer, best grown in the cooler seasons where it is widely used for bunching.	
HYBRID RADISH	sold by seed count	
Isis F1	Very uniform round red radish for warm season harvest. Shiny red roots with very compact green tops.	
Primex F1	Primex is a round, red hybrid radish. It produces high quality, extremely uniform bright red roots, with medium to large sized dark green tops. Primex is adaptable to most seasons.	
Red Planet F1	A new round, red hybrid radish. Medium sized tops with a strong connection. Fast maturing dark red glossy globe shaped roots. Incredible uniformity of size and shape, suitable for year round production.	
Sangria F1	Sangria is a round, red hybrid radish. It produces rich, red, round roots with a firm interior. Sangria is suited to warm conditions.	
RADISH DAIKON - LO	BOK	
RADISH DAIKON - GREEN SHOULDER	(60- 110 seeds/gram)	
Busan F1	Green shouldered Korean style daikon radish which has a shorter, rounder shape than the traditional Japanese types. Busan is not strong against bolting, so check local trial data before sowing at any given time.	
Busan No. 3 F1	A green shoulder Korean style daikon radish with a slighty more slender shape than is typical for this type. Relatively slow bolting. Very crunchy, sweet and spicy flavour.	
Geisha Girl No. 2 F1	Geisha Girl No. 2 is a slow bolting variety which produces very white smooth root with a light green shoulder, very uniform root thickness to the tip with minimal tapering. It has excellent uniformity and medium sized tops. Market standard for this type.	
Red Meat 'Watermelon Radish'	"Watermelon Radish", Red Meat produces round radishes with a green/white exterior and bright pink flesh. The roots have strong tops and a sweet flavour. Variety is not bolting tolerant. Please note: this is actually a type of daikon radish and will take longer to mature than standard red radish.	
Relish Cross F1	Relish Cross is a very refined green shouldered variety that is very popular in the Japanese Market. The radish is long at approximately 38cm x 8cm, has a conical shape and weighs up to 1.5kg. Relish Cross is not bolting tolerant.	
Unicorn F1	Light green shouldered variety with a slow bolting habit. Cylindrical, smooth and uniform with long tapered roots. Can be sown more widely than other varieties.	

ROOT VEGETABLES

RADISH DAIKON - LO	RADISH DAIKON - LO BOK	
RADISH DAIKON - WHITE SHOULDER		
April Cross F1	Market standard all-white Japanese style daikon radish. Approx. 40cm x 6cm root. Good bolting tolerance, but can bolt in spring and early summer in extreme conditions.	
Kings Cross F1	An April Cross type daikon radish. Pure white root with no green shoulder. Roots are very uniform and smooth, with a long, attractive, evenly tapered shape. Strong dark green tops, relatively slow bolting. Root is approx. 37cm x 6cm.	
Minowase No. 3 F1	Strong heat tolerance, best suited to late summer and autumn harvest. IR: Fusarium. Approx. 40 x 6.5cm	
SWEDE	(280-340 seeds/gram)	
Laurentian	Buff yellow swede with a purple top and creamy yellow flesh. Firm and crisp, usually sown in spring and summer for an autumn to early winter harvest.	
TURNIP	(350-450 seeds/gram)	
Cueball No. 3 F1	Extremely uniform, round, baby white turnip with vigorous vibrant green tops. Very popular in the bunching market.	
Jupiter F1	A hybrid Purple Top White Globe type. Jupiter has excellent vigour and uniformity. It is slower bolting in the warmer months and more vigorous through the cooler months. A truly professional option for the fresh and bunching market.	
Purple Top White Globe	Standard open pollinated turnip. PTWG has a white root, bright purple top, flat globe shape. Can grow all year round, but in cold areas, Jupiter is a much better option.	

BEANS, PEAS & CORN

BEANS	
BEANS BORLOTTI	(2-4 seeds/gram)
Red Rooster	Popular Borlotti bean with approximate length of 13cm-14cm, producing approximately 6-7 seeds/pod. Pods and seeds are both an attractive mottled colour. Red Rooster is highly susceptible to Summer Death.
BEANS BROAD	(2-4 seeds/gram)
Aquadulce	Tall Broad Bean with pods to about 15cm-18cm. Usually sown in late autumn to harvest in mid spring in Southern Australia. The plant will not usually be killed by frosts, but heavy frosts after flowering will delay fruit set.
BEANS BUTTER	(3-5 seeds/gram)
Dior [SDR]	Dwarf wax bean producing bright yellow beans, approx. 13cm long by 9mm wide. Suitable for both mechanical harvesting and hand picking. Mid plant vigour with excellent yield potential. It is the most attractive bean in our range. IR: Summer Death
BEANS CLIMBING	(3-5 seeds/gram) sold by seed count
Vitalis	European style climbing flat bean. Dimensions approx. $20cm \times 2cm$. Suitable for both indoor and outdoor production.
BEANS ROUND STRINGLESS	(3-5 seeds/gram)
Jade	The original variety, vigorous plant with long fleshy mid green pods. Suitable for small professional growers and home gardeners. Huge yields with excellent flavour and long post harvest shelf life. Approx. 17cm long, 10-11mm wide pods.
PEAS	
PEAS GARDEN	(4-6 seeds/gram)
Greenfeast	Traditional home garden shelling pea variety. Pointed pods approx. 11cm long, on a bush about 75cm tall. Greenfeast usually has pods containing 9 peas.
Melbourne Market (Massey)	Market standard shelling pea with a distinctive blunt pod approx. 9cm with 8 seeds/pod, bush about 40cm-50cm. Most popular market pea, due to its sweetness.
Willow	Dark green mid maturing shelling pea. Double set pods are more refined in appearance than Melbourne Market. Tall plant approx. 80cm. Pods are approx. 11cm long, setting up to 10 peas per pod with excellent sweetness. IR: Powdery Mildew (Ep).
PEAS SNOW	(4-6 seeds/gram)
Green Devil PBR	Slightly shorter pod than Oregon Giant, but much better colour and smoother shape. Usually has less cupping and straighter pods than standard Oregon Giant.
Oregon Giant	Market standard snow pea producing a relatively large pod approx. 13cm x 2.8cm. Plant habit is dwarf to mid sized, up to 1.2 metres and it can be grown successfully without a trellis. IR: Powdery Mildew (Ep).
Oregon Sugar Pod II	Dwarf snow pea. The plant is shorter than Oregon Giant, approximately 90cm tall and it produces pods approx. 10cm x 2cm. Intermediate Powdery Mildew (Ep) resistance. This variety is also commonly used for snow pea tendrils.
Sprouting Salad Pea	A cost effective variety for producing pea sprouts. This Dun Pea variety produces shoots with a classic, slightly sweet pea flavour.
PEAS SNAP	(5-6 seeds/gram)
Cascadia	Tall growing snap pea that can be grown as a free-standing bush, but has a height of approximately 1.5m when trellised. Pods are 7cm-8cm long and double set, but the variety is susceptible to Powdery Mildew.
Sugar Bon	Dwarf snap pea, growing to about 50cm tall. The pods of Sugar Bon are 7cm-8cm long. Intermediate Powdery Mildew (Ep) resistance.
SWEET CORN	(5-7 seeds/gram)
Endurance F1	New hybrid sweetcorn variety, similar genetic background and breeding profile to the variety Invictus with added benefit of rust resistance. IR:Common rust (Rp1G, Rp1D)
Invictus F1	A fresh market yellow super sweet corn with excellent colour and flavour. Invictus produces cobs with a cylindrical shape with good kernal depth, and approximately 18-20 kernals to a row. Cobs are uniform in shape with excellent tip fill and outstanding uniformity to maturity. Husks have a healthy flag leaf and provide good tip protection. Strong plant grows to approximately 2-2.2m tall. IR: Northern Corn Leaf Blight

FRUITING

	CICIINA EIELD	(450.000
CAI	SICUM - FIELD	(150-200 seeds/gram) sold by seed count
	Red Dream F1	A vigorous red capsicum with a strong plant that provides excellent cover for the fruit. It has a consistent blocky shape, with thick walls providing for firm fruit. Has shown a strong ability to set fruit under hot conditions in trials to date as well as having a lower instance of blossom end rot than standard varieties. IR: Tm 0, Nematodes M. incognita race 3 (R), Xcv 0, 1, 2, 4, 5, 7, 9
CHII	LLI	(150-200 seeds/gram) sold by seed count
NEW	Compadre F1 syngenta	A jalapeno chilli with very good plant vigour and leaf cover, and good setting ability. Suits spring and autumn planting, with good cold tolerance. Good fruit firmness, with smooth fruit surface.
NEW	Gochu F1	A new cayenne chilli with high quality straight firm fruit with a medium gloss. Early maturing variety, with high yield potential. Approx. 14cm x 2cm.
	Hotshot F1	Thick fleshed cayenne type chilli with deep red waxy fruit. Approx. 15cm x 2cm. High yielding. IR: TMV, PVY.
NEW	Little Hottie F1	A new hybrid thai chilli with upright fruit setting habit. Glossy and smooth skin, with fruit size approx. 7cm x 1cm. Vigorous plant producing fruit with a very long shelf life.
CUC	CUMBER - FIELD	(30-40 seeds/gram)
	Burpless Tasty Green F1	Continental type cucumber, very popular with home gardeners. Average length is 25cm-30cm and the variety is usually grown outdoors.
	Marina 2 F1	Gynoecious Beit Alpha hybrid. Smooth dark green Lebanese cucumber for outdoor production.
NEW	Tiny Tot F1	Mini Lebanese, snacking cucumber with sweet flavoured fruit and good crunch. Exceptionally high yielding variety with excellent fruit uniformity. Uniform cylindrical shape with semi rounded blossom end, 1-2 fruit per node.
EGG	PLANT	(180-250 seeds/gram) sold by seed count
	Little Fingers	Spineless, dark purple fruit with green calyx, slender and cylindrical, borne in clusters of 5-10.
fc	Black Pearl F1 (A germination room is required or this variety to achieve best results.)	Early, medium sized plant. Tear-drop shaped fruit, purple-black skin with high gloss. Approx. 19cm x 10cm, weight of about 500gm. Market leader. IR: ToMV.
PUN	MPKIN	(7-12 seeds/gram) sold by seed count
	Barbara F1	Unique style of hybrid Butternut with mottled Kent pumpkin like skin and firm flesh. Excellent shelf-life when harvested at maturity. High yield potential of approximately 1-1.5kg fruit.
	Delilah F1	Delilah is a hybrid sweet grey pumpkin for fresh market and processing use. The pumpkins are lightly ribbed and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity.
SQL	Delilah F1 JASH	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg
SQL		and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity.
TON	JASH	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity. (8-12 seeds/gram) sold by seed count A yellow button squash with a scalloped flat shape. Suitable as both a baby vegetable or fully mature size crop.
TON	JASH Gold Buttons F1 MATO -	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity. (8-12 seeds/gram) sold by seed count A yellow button squash with a scalloped flat shape. Suitable as both a baby vegetable or fully mature size crop. The plant is compact, with an open habit making it easy to harvest
TON	JASH Gold Buttons F1 MATO - ETERMINATE	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity. (8-12 seeds/gram) sold by seed count A yellow button squash with a scalloped flat shape. Suitable as both a baby vegetable or fully mature size crop. The plant is compact, with an open habit making it easy to harvest (300-500 seeds/gram) sold by seed count Ada is a a glossy red cherry tomato. Uniform fruit size and shape, with excellent sweet flavoured fruit. Ada has average bush vigour and good leaf cover. The fruit average approx. 18 – 25g in size and have a nice cocktail
TON	JASH Gold Buttons F1 MATO - ETERMINATE Ada F1	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity. (8-12 seeds/gram) sold by seed count A yellow button squash with a scalloped flat shape. Suitable as both a baby vegetable or fully mature size crop. The plant is compact, with an open habit making it easy to harvest (300-500 seeds/gram) sold by seed count Ada is a a glossy red cherry tomato. Uniform fruit size and shape, with excellent sweet flavoured fruit. Ada has average bush vigour and good leaf cover. The fruit average approx. 18 – 25g in size and have a nice cocktail oval shape. IR: TYLCV, Fol 1-3, M, ToMV Indeterminate mini roma type, with a vigorous plant and medium-high yield. Large fruit size with good size and
TON	JASH Gold Buttons F1 MATO - ETERMINATE Ada F1 Baby Roma F1	and have a deep borange flesh colour. It has a strong plant with a vigorous vine habit. The fruit average 6-7kg in weight and have a small seed cavity. (8-12 seeds/gram) sold by seed count A yellow button squash with a scalloped flat shape. Suitable as both a baby vegetable or fully mature size crop. The plant is compact, with an open habit making it easy to harvest (300-500 seeds/gram) sold by seed count Ada is a a glossy red cherry tomato. HR: ToMV, TSWV, VO, Fol1-3, IR: TYLCV, M A glossy yellow grape tomato with exceptional flavour and firmness. Fruit is of medium size at approx. 40mm x 25mm and approx. 15gms. The flavour is outstanding; quite sweet with a slight acidic finish. A versatile variety that suits both outdoor and covered cropping environments. A 'must trial' for any specialty tomato marketers. A reliable indeterminate round tomato with very consistent fruit size and uniformity. Nice firm large 200g fruit

Sowing your Success

ZUCCHINI	(8-12 seeds/gram) sold by seed count
Clarita F1	Lebanese type. Pale green fruit on a light yellow/grey background.

Belmonda PBR

Fresh market

Excellent heat, salt, drought and bruising tolerance with strong skin finish and disease resistance

▶ Perfect for brushing and washing with high yield, uniform round-oval tubers and long-term storability

Verdi PBR

Processing market

Outstanding cooking qualities after long-term cool storage

- Excellent yield potential after 140 growing days with specific agronomic strategies
- Strong disease resistance

Queen AnnePBR

Fresh market

- Versatile, long term storage variety with beautiful skin finish, excellent flavour and good yield
- ▶Long oval shape, suitable yellow flesh Dutch Cream replacement with resistance to bruising and disease

Papageno PBR NFW Processing market

- Very high yielding crisping and wedging
- Low defects and excellent cooking results after medium to long-term storage

Lilly PBR

Fresh market

- ▶ Very high marketable yield, excellent flavour and extremely versatile end use
- ► Well suited to winter/spring planting, strong disease resistance and bruising/ damage tolerance

Baby Lou PBR NEW Fresh market

- Fresh market baby potato variety, compact plant with exceptionally high tuber set
- ►Glossy yellow skin and flesh, high yields of firm-cooking chat potatoes < 55mm
- Excellent taste and culinary quality

12/53 Gateway Blvd Epping, VIC, 3076

DISEASE RESISTANCE

Resistant is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen and/or the damage they cause when compared to susceptible plant varieties under similar environmental conditions and pest or pathogen pressure. Resistant varieties may exhibit some disease symptoms or damage under heavy pest or pathogen pressure.

Two levels of resistance are defined:-

High standard resistance (HR): plant varieties that highly restrict the growth and development of the specified pest or pathogen under normal pest or pathogen pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest or pathogen pressure.

Moderate/Intermediate resistance (IR): plant varieties that restrict the growth and development of the specified pest or pathogen, but may exhibit a greater range of symptoms or damage compared to high/standard resistant varieties.

Moderately/Intermediately resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and / or pest or pathogen pressure.

Susceptibility is the ability of a plant variety to restrict the growth and development of a specified pest or pathogen. The Vegetable Section of ISF recommends, as it pertains to biotic stress, that its members use the terms immunity, high/standard or moderate/intermediate resistance and susceptibility and to avoid the term tolerance in communications with their customers.

Tolerance is the ability of a plant variety to endure abiotic stress without serious consequences for growth, appearance and yield. Vegetable companies will continue to use tolerance for abiotic stress.

DISEASE ABBREVIATIONS

Basil

Fob = Fusarium wilt (Fusarium oxysporum f. sp. Basilicum)

Pb = Downey Mildew (Peronospora belbahrii)

Brassicas – Broccoli, Brussels Sprouts, Cabbage,

Chinese Cabbage, Cauliflower

Va, Vd = Verticillium wilt (Verticillium albo-atrum, Verticillium dahliae)

FAIRBANK'S SELECTED SEEDS CO. PTY LTD - TERMS OF TRADE

1. INTERPRETATION

"ACL" means the Australian Consumer Law Schedule of the Competition and Consumer Act 2010 (Cth) as amended.

"Agreement" means this Agreement.

"Customer" means the party Purchasing Products or Services from Fairbanks.

"Fairbanks" means Fairbank's Selected Seed Co. Pty Ltd.

"GST" means the Goods and Services Tax as defined in A New Tax System (Goods and Services Act) 1999(Cth) as amended.

"PPSA" means the Personal Property Securities Act 2009 (Cth) as amended. "Products" means any Products, including seeds, which Fairbanks sells or provides to the Customer from time to time.

"Price List" means the list prices for Products and Services kept and updated from time to time by Fairbanks.

"Services" means any services which Fairbanks sells or provides to the Customer from time to time.

"Site" means any location to which the Customer requests that Product be delivered or at which Services are to be performed.

2. ACCEPTANCE OF AGREEMENT

The Customer agrees that by purchasing any Products or Services from Fairbanks it thereby enters into this Agreement with Fairbanks and agrees to be bound by the terms contained herein.

3. ENTIRE AGREEMENT

a) These terms shall constitute a full and complete statement of the Agreement between Fairbanks and the Customer and no variations or modifications of any term of the Agreement shall be binding unless agreed to in writing by Fairbanks.

b) Fairbanks may vary or amend these terms by written notice to the Customer at any time. Any variations so made will only apply to orders placed by the Customer after the time that the variation has been bought to the Customer's attention.

4. TERM OF AGREEMENT

This Agreement shall apply to all dealings between the parties until it is replaced by an alternate written Agreement or is terminated in accordance with its terms.

5. SUPPLY OF THE PRODUCTS AND SERVICES

a) The Customer may order from Fairbanks from time to time such quantities of Products and Services it requires, with orders to be in such format (whether written or otherwise) as Fairbanks may require.

b) Whilst Fairbanks will use its best endeavours to ensure that it is able to provide Products and Services to the Customer when required, it does not warrant or guarantee that it will be able to do so and will not be responsible for any losses alleged to have been suffered by the Customer as a result of failure to supply or delay in supplying Products and Services, regardless of the reason for the failure to supply. In this regard the customer acknowledges that availability of seed is unpredictable and, irrespective of whether seed or other Products are marketed by Fairbanks, no representation of ability to supply is given by Fairbanks to the Customer. c) Fairbanks retains the absolute discretion at all time to refuse to accept any order made by the Customer for Products or Services.

d) Any period or date for delivery of Product or Services stated by or on behalf of Fairbanks shall be regarded by the Customer as an estimate only and not a contractual commitment or representation which may be relied upon.

e) The Customer acknowledges that Fairbanks may at its discretion engage agents or subcontractors in the provision of Products and Services to the Customer.

6. SITE REQUIREMENTS

a) The Customer shall provide suitable and practical means of access to the Site and ensure that the Site is suitable to allow the efficient and safe delivery of Products and Services.

b) The Customer warrants that it is the owner of the Site, or, if it is not, that it is authorised by the owner to allow for Services being performed at the Site.

c) The Customer shall ensure that any other parties performing works at the Site do not interfere with or otherwise hinder Fairbanks's provision of Services. In this regard to the Customer shall provide to Fairbanks

any information reasonably required by it in respect to the activities or proposed activities of any other party performing works at the Site.

d) At no time does Fairbanks take or accept any responsibility for the Site and all risk and liability in and relating to the Site remains with the Customer at all times.

e) Products are not sold on a consignment basis unless Fairbanks specifically agrees in writing to do so.

7. INFORMATION AND SEED SUITABILITY

Any figures or data provided by Fairbanks to the Customer (whether before or after this Agreement is entered into) are for general comparative purposes and are not absolute values and are intended as an introductory guide only. Such information must be considered by the Customer in the context of location, climate, soil type and conditions and any other relevant growth and development factors. Accordingly any purchases are made on the basis that the Customer acknowledges and agrees that-

a) Seed products will not necessarily be suitable for a given location, soil type, climate or season;

b) It will not purchase seed products from Fairbanks unless it has prior to placing any order obtained specific advice from a suitably qualified agronomist or direct from Fairbanks as to the desirability of growing the relevant seed –

(i) In the location;

(ii) At the time; and

(iii) Under the conditions

that it is proposed the seed will be grown;

c) It will in utilising any seed purchased from Fairbanks, follow accepted industry best growing practices and seek and follow suitable agronomy advice at all times; and

d) Fairbanks recommends that in all cases a small scale trial of the relevant product be conducted at the proposed site of production at the appropriate seasonal timing to test the suitability of the product for local conditions.

8. PRICING AND PAYMENT

a) The Customer shall be charged for the Products and Services as set out in Fairbanks's Price List as it applies at the time of the Customer placing an order for Products and or Services. If a Product or Service does not appear on the Price List, or if the Price List does not or ceases to exist, then Fairbanks shall be entitled to charge a reasonable amount for that Product or Service. b) The Customer acknowledges that the Products and the prices in the Price List may be modified by Fairbanks from time to time without notice throughout the currency of this Agreement and it shall be the responsibility of the Customer to check with Fairbanks as to the availability and price of any particular Product immediately prior to placing any order.

c) The terms of payment shall be as notified by Fairbanks from time to time save that Fairbanks shall be free at any time, at its sole discretion, to revoke payment terms in regard to any future orders and require payment in advance of supply of further Product or Services.

d) Payment by cheque is not deemed to have been made unless and until the proceeds of the cheque have cleared.

e) Unless otherwise stated quotes for Products or delivery are exclusive of GST and any other applicable taxes or duties. In addition to the price for the Products and Services the Customer shall also pay any applicable GST, taxes or duties.

f) Any quotation provided by Fairbanks to the Customer shall, unless otherwise stated in the quotation, be valid only for 7 days from the time it was made and may be withdrawn at any time by Fairbanks within that period.

g) In respect of payments required to be made by the Customer under this Agreement time shall be of the essence.

9. BREACH BY CUSTOMER

a) Interest shall be payable on any amounts outstanding outside payment terms by the Customer to Fairbanks at the rate of 2% over and above the rate applicable from time to time under the Penalty Interest Rates Act 1983 (Vic).

b) The Customer hereby indemnifies Fairbanks in respect of any costs incurred by Fairbanks (including legal costs on a solicitor/client basis) as a result of any breach of this Agreement by the Customer, including any breach of terms of payment for Products or Services. Such costs include but are not limited to the costs of any demands made of the Customer to remedy any breach, and any legal proceedings to recover unpaid money.

10. RETENTION OF TITLE TO PRODUCTS

Until Fairbanks receives full payment (in the form of clear funds) for any Products supplied by it to the Customer together with any other amounts owing by the Customer to Fairbanks-

- a) Title and property in all of the Products yet to be paid for remains vested in Fairbanks and does not pass to the Customer;
- b) The Customer must hold the goods as bailee for Fairbanks;
- c) The Customer must hold the proceeds of any sale of the Products on trust for Fairbanks; and
- d) In addition to its rights under the PPSA Fairbanks may without notice, enter any premises where it suspects that the Products are and remove them, and for this purpose the Customer irrevocably licenses Fairbanks or its agents to enter onto such premises and also indemnifies Fairbanks from and against all costs, claims, demands or actions by any party arising from such action.
- e) For the purposes of the PPSA, by executing this Agreement the Customer grants to Fairbanks a Security Interest in the Products and Fairbanks shall be entitled to register the Security Interest on the relevant Security Register.

11. PERSONAL PROPERTY SECURITY ACT

- a) For the purposes of the PPSA -
- (i) Terms used in this clause have the corresponding meaning to their use in the PPSA:
- (ii) These Terms constitute a security Agreement between Fairbanks and the Customer and Fairbanks has a Purchase Money Security Interest in all present and future Products supplied by Fairbanks to the Customer and the proceeds of those Products;
- (iii) The security interest is a continuing interest irrespective of whether there are monies or obligations owing by the Customer to Fairbanks at any particular point in time.
- b) The Customer must do whatever shall be necessary in order to give a valid security interest over the Products and their proceeds which is able to be registered by Fairbanks on the Personal Property Securities Register. Without limiting the Customer's obligations under this clause, the Customer must immediately upon Fairbanks's request –
- (i) Execute all documents and do any other things necessary to give effect to the security interest created under these terms; and
- (ii) Procure from any person considered by Fairbanks to be relevant to its security position such Agreements and waivers as Fairbanks may require at any time.
- c) The security interest arising under this clause attaches to the Products when the Products are collected from or dispatched from Fairbanks's premises and not at any later time.
- d) Fairbanks shall be free to allocate sums received from the Customer in any manner Fairbanks determines, including in any manner required to preserve any Purchase Money Security Interest or any other security interest it has arising by virtue of supply of Products to the Customer.

12. RISK, INSURANCE AND LIABILITY

- a) The risk in the Products and all insurance responsibility for theft, fire or damage of any other kind shall pass to the Customer immediately upon delivery of the Products to the Customer or upon collection by the Customer from the point of sale (whichever is applicable), regardless of whether there is any further work to be completed by Fairbanks in regard to those Products.
- b) The Customer warrants that it has and will have at the time of making any particular order for Products all necessary licenses or permits under all relevant laws and regulations to possess and use the Products.
- c) If Fairbanks is liable for a breach of a guarantee implied by the ACL in respect to the provision of the Products or Services and those Products or Services are not of a kind ordinarily acquired for personal, domestic or household use or consumption, then, to the extent permitted by the ACL, its liability to the Customer will be limited to –
- (i) The replacement of the Products or the supply of equivalent Products;
- (ii) The payment of the costs of replacing the Products or acquiring equivalent Products;
- (iii) The supplying of the Services again; or
- (iv) The payment of the cost of having the Services supplied again.

13. CANCELLATION OF ORDERS

No purported cancellation, variation or suspension of an order for Products or Services (or any part of an order for Products or Services) shall be binding upon Fairbanks once the order has been placed with Fairbanks.

14. FORCE MAJEURE

Fairbanks shall not be liable in any manner whatsoever to the extent that it has been prevented from performing any obligation under this Agreement by reason of matters beyond its control, including without limitation-

- a) Inability to source Products;
- b) Inability to access the Site or part of the Site;
- c) Lack of access to electricity or other required resources at the Site;
- d) Lack of availability for whatever reason of staff or contractors;
- e) Acts of God, accidents or machinery breakdown;
- f) Acts or threats of terrorism or war; or
- g) Industrial disputes or strikes.

15. TERMINATION ON NOTICE

Either party may terminate this Agreement at by giving the other party 30 days' notice of its intention to do so.

16. IMMEDIATE TERMINATION OF AGREEMENT

Fairbanks may terminate this Agreement immediately by giving written notice to the Customer if the Customer:

- a) Goes into liquidation;
- b) Has an administrator or a receiver to its property or assets appointed;
- c) Is made bankrupt;
- d) Materially breaches its obligations under this Agreement where such breach is either not capable of remedy or, if capable of remedy, the Customer fails to remedy such breach within 14 days after receipt of written notice of such breach by the other party; or
- e) Engages in any conduct (which includes any conduct by employees of the Customer) which in the opinion of Fairbanks is or might be damaging to the reputation of Fairbanks or any of the Products.

17. EFFECT OF TERMINATION

The termination of this Agreement for whatever reason shall not in any way effect any rights or responsibilities accruing prior to the termination taking effect and Fairbanks's rights in the event of default (including the ongoing accrual of interest and the right to indemnity for costs) shall continue beyond any termination.

18. RELATIONSHIP OF PARTIES

Nothing in this Agreement shall give rise to a partnership or relationship of employment between the parties.

19. WAIVER

Any failure or delay by Fairbanks to exercise a power or right does not operate as a waiver of that power or right. The exercise of a power or right does not preclude either its exercise in the future of the exercise of any other power or right. A waiver is not effective unless it is in writing.

20. READING DOWN OF AGREEMENT

If a clause in this Agreement is unenforceable it must be read down so as to be unenforceable or, if it cannot be so read down, it must be severed from this Agreement without affecting the enforceability of the remaining terms of the Agreement.

21. JURISDICTION

This Agreement shall be governed by the laws of Victoria.
